The scientific conference on neobiota in the Wadden Sea was a first step towards implementing the agreement the AWI Wadden Sea Station, who organizes the summer school. “It underlines the unique value of the education and presents new and useful learning sessions for schools and teaching. After a simple, free management. 15 participants from Germany, France, The Netherlands and Croatia joined the course this year with Ecomare, Texel. The module contains basic World Heritage information and can be extended with "The World Heritage status of the Wadden Sea is also for scientists of high relevance" says Ragnhild Asmus of...
